Art Unit: 2813

DETAILED ACTION

1. Applicant's request for reconsideration of the restriction requirement of the last Office action; accordingly, the restriction requirement of that action is withdrawn. However, the examiner notices that there are some improper grouping of the patentably distinct species of the claims as indicated in the previous restriction requirement. Accordingly, the corrected distinct species are shown below.

Election/Restriction

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, method for forming T-shaped gate conductor in the trench of the *silicon rich nitride* layer according to first embodiment. 5 8 14

Species II, method for forming T-shaped gate conductor in the trench of the *silicon oxynitride (SiON)* layer according to second embodiment. 7

Species III, method for forming the trenches/aperture (figs. 4-5) by using selective etching process according to third embodiment. 6

Species IV, method for forming the trench/aperture by using RELACS (fig. 9) process according to fourth embodiment. 18

Art Unit: 2813

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.
4. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
6. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2813

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chen whose telephone number is (703) 308-5838. The examiner can normally be reached on Monday-Friday (alternate Monday off) from 8:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead, Jr., can be reached on (703)308-4940.
